### **DETAILED ACTION**

Group I, claim(s) 1-12, drawn to a section of a tubular foodstuff casing.

Group II, claim(s) 13-22, drawn to a casing of a particular material.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group 1 does not require a particular type of casing material.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

In claim 2, a sealed seam, a welded seam or adhesive seam.

Claim 3 a heat sealable or weldable polymer material.

Claim 13 requires heat-sealable polymer material or a layer or coating inside.

Also, claim 13 requires 4 different types of casing material, applicant should chose one.

Also, in claim 13, applicant should choose type of seams as in the last two lines.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

In claim 2, a sealed seam, a welded seam or adhesive seam.

Claim 3 a heat sealable or weldable polymer material.

Claim 13 requires heat-sealable polymer material or a layer or coating inside.

Also, claim 13 requires 4 different types of casing material, applicant should chose one.

Also, in claim 13, applicant should choose type of seams as in the last two lines.

The following claim(s) are generic: 1, 13

Art Unit: 1794

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the seams in claims 2 and 8 are all different types of seams. The heat-sealable or weldable polymer material as in claims 3 and 6, are different types of material.

In claim 13, the casing materials are all different and require different searches.

A telephone call was not made to the attorney of record on 3-28-08 to request an oral election to the above restriction requirement, due to the complexity of the restriction.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
